# 2008

OCTOBER 19 - 22

WASHINGTON DC

MPLS2008.COM

*Please mark your calendars for Isocore's MPLS 2008 conference which will be held from October 19-22, 2008 in Washington, D.C. at the Omni Shoreham Hotel.*

*Veterans of the MPLS conferences already know and those of you who will be joining us for the first time will find out that MPLS conference is Isocore's annual conference on Multi Protocol Label Switching that invites industry leaders to meet and exchange ideas on the hottest technologies.*

*Ever since 1998 when the foremost MPLS conference was held, it has been the cream of the crop event on the subject of MPLS, Carrier and Metro Ethernet, IP-Optical Networks, Converged Services delivery and emerging Internet technologies.*

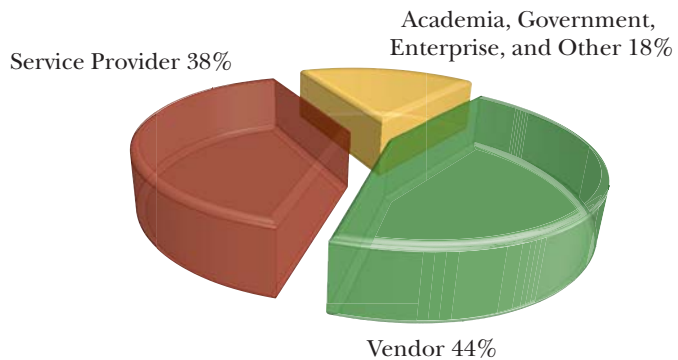

### What to Expect at MPLS 2008

Keeping in line with its forbearers, MPLS 2008 will serve to be the antecedent factor in bringing together service providers, large enterprise and government network community, and networking equipment vendors together. MPLS 2008 will embrace an exhaustive four day agenda that will consist of tutorials, technical sessions, panels, and exhibits. Other topics to be discussed at this years conference include: Carrier/Ethernet Metro, Triple-Play applications on MPLS and many more.

### Inter-Op Demo

As always the conference will be followed by an exclusive Inter-Op Demo which will be held at Isocore's office in Reston, Virginia. The Inter-Op Demo is an Isocore tradition that allows its members to showcase their company's latest technologies in an open-lab environment. The Inter-Op Demo will be available to all MPLS 2008 participants.
